Abstract

1 Introduction

PCA as a means to identify the most information-rich features.

All homework submissions are limited to give pages of text (with additional pages for bibliography). The final project is limited to eight pages of text (with additional pages for bibliography). Note that any homework or project submissions that exceed these page limits will not be read.

an introduction to the problem being addressed; ? a description of the data;

2 Related Work

3 Methods

3.1 One method in detail

Select one of the methods you chose for application in this assignment and describe in detail the model or objective, the method for inference, and the approach for prediction in future samples. Include a description of the important assumptions relevant for these data and these analytic questions.

4 Results

5 Discussion and Conclusion
